Hours of Work

PURPOSE

Fatigue is a proven safety hazard for commercial drivers, and violating regulated limits can have serious consequences for a carrier's operating record, profitability and road safety in general. As hours of work legislation affects many areas of a commercial fleet's operations; drivers, supervisors, dispatchers, trainers and other safety personnel must have a thorough understanding of duty cycles and limits.

This three-day intensive course focuses on how to achieve and monitor driver and carrier compliance with hours of work legislation. Topics will include provincial and federal laws; logs and time sheets; duty cycles; record keeping; driver and carrier responsibilities; and monitoring daily logs.

PROCEDURE

Upon successful completion, participants will be able to:

- Understand the purpose, structure and application of hours of work legislation;
- Identify legislated responsibilities of both commercial drivers and fleet operators concerning the maintenance of driver duty status records;
- Identify training requirements for personnel involved with the transportation of dangerous goods, as applied to hours of work; and
- Demonstrate a thorough knowledge of filling out daily logs.

COURSE	Hours of Work
FORMAT	Classroom; Interactive workshop
DURATION	3 Days
PARTICIPANTS	Fifteen (15) maximum
FACILITIES	Classroom or boardroom supplied by company
WRAP UP	A wrap-up meeting involving the company and the OSL Facilitator is desirable as it provides an opportunity to discuss overall driver test results, attitudes and consequent development strategies for consideration.
OSL FACILITATOR	OSL-trained signing authority status (former MTO inspector)
PROGRAM CO-ORDINATOR PROGRAM SUPPORT & RESOURCES	Extensive experience in transportation safety and loss prevention The Ontario Safety League's staff and resources are available for inquiries into licensing, regulations, driver training and improvements, collision investigation & reconstruction, and other areas related to safety in the transportation sector.
