Load Security

PURPOSE

Safe operation of commercial vehicles is dependent on a number of variables that are largely addressed by the standards contained in the National Safety Code. The way a load is secured will either contribute to or detract from the overall safety potential of the vehicle in question.

PROCEDURE

This workshop provides a detailed review of the standards and regulations that govern load securement for cargo transported on-road by truck and/or trailers. Strong emphasis will be placed on requirements in place in Ontario. Participants will be introduced to specific terminology used to describe acceptable means of securing cargo as well as relevant regulatory compliance issues.

Upon successful completion, participants will be able to:

- Understand the purpose, structure and application of load securement standards and regulations;
- Reference applicable laws, regulations and guidelines on configuring and securing loads;
- Demonstrated a through knowledge of common securement devices and equipment, as well when and how they should be used;
- Identify securement protocols for various commodities and vehicles;
- Identify whether or not a load is properly secured;
- Understand and explain issue-specific terminology.

COURSE	Load Security
FORMAT	Classroom; informal instruction, interactive discussions and practical exercises
DURATION	1 day
PARTICIPANTS	Fifteen (15) maximum
FACILITIES	Classroom or boardroom supplied by company
OSL FACILITATOR	OSL-trained signing authority
PROGRAM CO-ORDINATOR PROGRAM SUPPORT & RESOURCES	Extensive experience in transportation safety and loss prevention The Ontario Safety League's staff and resources are available for inquiries into licensing, regulations, driver training and improvements, collision investigation & reconstruction, and other areas related to safety in the transportation sector.
